Hamaguchi Full & Slip-on Race Systems

Hamaguchi Ti full exhaust systems truly are works of art. You won't find better craftsmanship at any price anywhere. These are the same exhaust systems used by the four time FIM Asia Supersport Champion. Each pipe is hand made by skilled craftsman who use the "Wagiri" method of forming tight radius bends without disrupting flow. This method of pipe fabrication is used on GP and high end race machines. Also, variable diameter tubing is used throughout the length of piping to ensure best power is made.

Because of the many hours of research put into developing the FIM Asia championship winning machine, the power output of these systems is quite good. These fully titanium systems are very light weight with excellent flow and sound.

California Gold Paint Chip Repair

Let's face it-no matter where you drive, chips happen. Rocks and road debris can pit your paint's surface, creating unsightly marks and leaving your car vulnerable to rust and corrosion. Touch up paints can vastly improve the appearance of your vehicle, but tend to leave behind "blobs" of paint. Mothers' new Paint Chip Repair used in conjunction with matching touch up paint-will remove those blobs, leaving the surface perfectly smooth and looking like new. Sold in 2 oz. bottle.

Order No. 800-789

California Gold Clay Bar Paint Saving System

You've heard about clay bars-professional detailers, body men and your car buddies all talk about how well they work. Now use the clay bar everybody wants. Created to remove the particulate debris and contaminant that washing and polishing can't. Our exclusive Paint Saving System will remove embedded grains of metal, tree sap, airborne environmental deposits and paint overspray. Better yet, our clay bar isn't hazardous to your paint-it's just firm enough to pick up the bad stuff, without being too aggressive. Use Mothers Clay Bar to get rid of paint fouling grime and pave the way for complete waxing. Includes: 80 gram Clay Bar, 16 oz. Showtime Instant Detailer, 4 oz., Original Formula Carnauba Cleaner Wax.

Order No. 800-781

Tire & Rubber Cleaner

Got the dirty tire blues? Use our new Tire & Rubber Cleaner to clean off dirt, soil and old dressing from the surface of your tires. Any dirty and neglected rubber surface can benefit from a good cleaning. Modern chemistry makes it safe and effective to use on any surface. Clean your tires and rubber trim prior to applying dressings and gels for that professional detailed look. Sold in 24 oz. spray bottle.

Order No. 800-773

California Gold Showtime Instant Detailer

Treat your paint to a Showtime sparkle that's wet and striking. Whether you want to clear a layer of dust or prepare for the judges, use Showtime Instant Detailer. This unique formula will clean off fingerprints, smudges, dust, hide minor imperfections and spider webbing. Showtime is designed with color enhancers and shine fortifies, ready whenever you need your ride to look freshly detailed. Sold in 16 oz. spray bottle.

Order No. 800-784

Keep a couple of dry towels handy as Showtime shines best with a dry towel. Be sure to remove Showtime before it evaporates. Showtime can be applied in direct sunlight as long as the surface is not excessively warm.

Synthetic Motor Oils

Red Line's synthetic engine oils are designed to provide the highest protection, cleanliness and superior drain intervals with the lowest friction for your gasoline, diesel, motorcycle or marine engine. Redline's products are unique because they contain polyol ester base stocks, the only lubricants which can withstand the tremendous heat of modern jet engines.

Sold in quart bottles.

Two-Stroke Racing Oil

Red Line's popular two-stroke lubricants contain base oil which have the highest film strength and greatest affinity for hot metal. Because Red Line is a superior high temperature lubricant, it can be used at lower fuel to oil ratios, increasing power and providing excellent scuff protection and cleanliness. Where many two-stroke oils are recommended to run 32:1, many Red Line customers often mix at a leaner 40:1. Red Line provides the lubricating cleanliness, with low carbon residue that dramatically reduces plug fouling and smoke. Red Line provides special protection for formulated fuels. Dyno proven to make more power over longer periods of operating time.

High Peformance Motorcycle Oils

Red Line's High Performance Motorcycle Oils are fully-synthetic formulas specifically created for the high demands of the latest high-revving four-stroke motocross bikes, ATVs, Sportbikes, and V-Twins. Available in popular viscosities of 10W30, 10W40, 20W50, and 20W60, these ester-based products contain the anti-wear chemistry demanded by mechanics and enthusiasts.

This oil also features lower levels of friction modifiers for superior wet clutch operation. Excellent thermal stability, oxidation resistance, cleanliness, and ability to lubricate hot metal make Red Line High Performance Motor Oil a superior lubricant. Recommended for JASO MB, API SJ, SG, & SH. Sold in quart bottles.

Synthetic Racing Oil

Red Line's racing synthetic oils are made with the most thermally stable synthetic base stocks available and provide the best high-temperature lubrication and a higher film strength than any petroleum or synthetic on the market today. Although Red Line racing oils are categorized as "straight grades", their low-temperature properties make them exceptional multigrade, allowing 2-4% more power than an oil of similar viscosity, while providing much more protection. Each reduction in viscosity grade allows 1-2% more power. To reduce the chance of detonation, Red Line race oils contain very few detergents and are not recommended for street use.

Suspension Fluids

Red Line Suspension Fluids provide very good shear stability which means that they should not degrade with use. They change very little with temperature and will provide lower operating temperatures for the same viscosity when compared to conventional suspension fluids. They are also very low forming and provide good seal lubricity and antiwear properties. They can be blended together in any proprotion to achieve an intermediate viscosity. For use in cartridge forks and motorcycle shocks.

Synthetic CV-2 Grease

Red Line CV-2 Grease is designed to withstand the extreme temperatures and pressures which occur in high-performance wheel bearings and CV-joints. The excellent high-temperature stability, extreme-pressure protection, and water resistance enables it to out-perform even the best conventional or synthetic greases. Red Line CV-2 Grease can be used in a wide range of applications at temperatures ranging between -100° F to 500° F and provides good oxidation and corrosion resistance, low evaporation and oil separation, and has a minimum effect on rubber seals.

Sold in 14 oz. tub.

Order No. 900-850

Assembly Lube

Provides three-times greater film strength than conventional black Molybdenum Disulfide greases and will not clog oil filters. This product clings to all surfaces and is an excellent rust inhibitor, allowing the storage of parts for years. A thin film of protection is all that is required when mating parts.

Sold in 4 oz. tub.

Water Wetter®

Water Wetter is a unique wetting agent for cooling systems which reduces coolant temperatures by as much as 30° F. This liquid product can be used to provide rust and corrosion protection in plain water for racing engines, which provides much better heat transfer properties than glycol-based antifreeze. Or it can be added to new or used antifreeze to improve the heat transfer of ethylene and propylene glycol systems. Designed for modern aluminum, cast iron, copper, brass and bronze systems. Compatible with all antifreezes, including the latest long-life variations. Sold in 12 fl. oz. bottle.

Super Cool with Water Wetter

Performance coolant with Water Wetter. Super Cool with Water Wetter is a pre-mixed coolant for motorcycles, ATV's, karts, generators and other small water-cooled engines. This product doubles the wetting ability of water to improve heat transfer and reduce cylinder head temperature. Provides excellent rust and corrosion protection for modern cast iron, aluminum and brass systems. Sold in 1/2 gallon container.

SI-1 Complete Fuel System Cleaner

SI-1's injector and valve detergent is a concentrated package of the most powerful high-temperature detergents available to clean gasoline fuel injectors or carburetors, intake valves and combustion chambers. and can clean injectors to nearly 100% efficiency in one treatment. The cleansing effect on injector deposits can raise fuel economy 12% or even greater depending on the condition of the injectors. SI-1 also contains detergents and a synthetic upper cylinder lubricant which will help clean pollution control valves and can reduce octane requirements by two numbers. SI-1 also protects the fuel system from rust. Sold in 15 fl. oz. bottle.

4-Stroke Alcohol Fuel Lube

Red Line Alcohol Lube is designed to combat corrosion and water absorption within the fuel system of alcohol burning racing engines. This specifically developed product will provide lubrication for all system components as well as the upper cylinder, resulting in a much longer component life when compared to straight alcohol. Sold in 12 fl. oz. bottle.

80W Motorcycle Gear Oil with ShockProof™ **New**

Designed for applications like two-stroke bikes, shifter karts, the CRF250/ CRF450 transmission. Used where an 80W oil is called for, ShockProof's microscopic solid medium provides cushioning between gear teeth, while maintaining lower drag. Reduces the thining effect from high temperatures. Sold in quart bottle.

ShockProof™ Gear Oil

A unique lubricant containing a suspension of solid microscopic particle as an extreme pressure agent--unique solid dispersion which cushions gear teeth to help prevent tooth breakage and allows the use of lower viscosities. The viscosity characteristics allow the lubricant to resist throw off and provide a film thickness greater than an SAE250 grade, with the same low fluid friction as with 80W140. Recommended for heavily-loaded racing differentials and transmissions, Off Road racing and problem gearboxes. Offers a "best of both worlds" balance of relatively low drag and utmost in protection. Sold in quart bottles.

Keihin FCR (Flatslide CR) Racing Carburetors

Following in their tradition of high technology and performance, Keihin's latest carburetor design for racing is the FCR designed for downdraft engine design use. Features include a flatslide throttle operating on roller bearings with progressive linkage for smooth operation and control. Smoothbore venturi for maximum air flow. This is the ultimate racing carburetor for use on downdraft engines as found on many popular sportbikes destined for serious competition. Along with the highest level of technology available, the FCR's have proven there advantage with race wins around the world.

FCR-MX with Air Cut Valve, Hot Start & TPS

Keihin FCR-MX Series Off-Road Racing Carburetor

The ultimate for off-road performance. Keihin has developed an FCR carburetor designed for the specialized needs of the off-road racer. The FCR-MX carburetor has many new features to take motocross and ATV performance to the next level. These are some of the unique features of the Keihin FCR-MX for off-road applications:

- Over-flow drain joint and Tube
- Hot re-start knob
- Throttle Cable enclosure
- High capacity float chamber
- Air Cut-Off Valve (ACV) for de-acceleration enrichment (only on FCR-MX carburetors listed)
- Float chamber baffle for rough terrain
- Quad Vents

R&D Racing Power Pump

A whole lot of technology built into such a small part. R&D Racing has designed a "TRUE" bolt-on accelerator pump for the FCR-MX with an adjustable leak jet circuit included. Also included in the design is an anti-cavitation fuel chamber proven to "get the air out" allowing the diaphragm pump to work at full efficiency, producing a far superior throttle response over other designs.

R&D Racing Power Bowl

The Power Bowl from R&D Racing is an innovative fuel supply system float bowl with an anti-cavitation accelerator pump and adjustable leak jet. Designed for the Keihin FCR-MX carburetor, it is bolt-on and requires no modifications. Features include:

- "ZERO TOLERANCE JET CHAMBER"
Minimizes existing clearances eliminating the possibility of fuel evacuation from around the main and pilot jet area. (no bog)
- "ANTI-CAVATION ACCELERATOR PUMP"
Designed with two separate fuel ports. Port one is positioned at the highest point in fuel chamber, providing a natural purge, allowing entrapped air to escape through the leak jet orifice. Port two is isolated low in the fuel sump area assuring "Fuel Only" into the venturi.
- "EXTERNALLY ADJUSTABLE LEAK JET"
Quick and easy hand adjustment for fine tuning.

Available for all 4-stroke MX machines with Keihin FCR-MX carburetor.

KEIHIN CR Special Racing Carburetors

Keihin Roundslide CR Sidedraft Racing Carburetors

The choice of Team Honda for years on all there in-line 4-cylinder race bikes in Superbike, World Championship Endurance and Formula One classes. You'll find the power you need with these Keihin Roundslide CR carburetors. Designed for use on sidedraft four-stroke motorcycle engines. Features include: Improved throttle response; direct linkage to slides provides more precise control than vacuum slide carburetors. A 10% horsepower gain can be expected; Smooth venturi design produces stronger power than original equipment carburetors using butterfly throttle valves. Race fuel capability. Available for gasoline or alcohol use. Rejetting required when using alcohol or methanol, kit available as an option. Ready to bolt-on and run, these kits come complete with mounting spigots, velocity stacks and velocity stack covers. Available sizes: 26, 29, 31, 33, 35, 37 and 39mm. Intake length can be adjusted with optional mounting adapter spigots. Most replacement and tuning parts are available, please see CR Special exploded view, parts list and parts/accessories on page 48-53.

Keihin PWK Series Carburetors

Producing power without compromise, Keihin PWK carburetors have set the standard for ATV, motocross, and offroad racing carburetors. Because of there great performance, they come stock on a lot of leading brand names. PWK features include:

- Chromed semi-flat (D shape) throttle valve for excellent response and more flow at high RPM.
- Throttle Bores sized to give maximum power.
- Quad Vents - Eliminates post jump bogging from fuel plugged vent passages.
- PWK Air Strikers - Directs air to main nozzle for improved signal and throttle response.

PWK carburetors are available in Standard (Non Air Striker) and Air Striker/Quad Vent. Sold each.

PE20 & PE24mm Jet Needles

Jet Needle selection notes: (see chart at bottom)

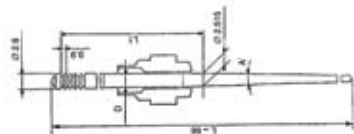

1. Taper and diameter are the 2 primary dimensions.
2. Larger diameter is leaner at low speeds.
3. Larger taper angle becomes richer faster as speed increases.
4. If diameter and taper are the same, larger L1 will stay leaner longer.
5. A higher clip position will stay lean longer.

OEM-N427-48- Series Conversion Chart

1. How To Read Marks

1) Mark on OEM Jet Needle 16 digits!

- 1st digit of MARK on OEM's tells you the KEIHIN Part Number
- NEXT TWO DIGITS (2nd & 3rd) tell you TAPER angle.
- NEXT TWO DIGITS (4th & 5th) tell you DIAMETER of needle.
- LAST DIGIT (6th) tells you L1.

2) Mark on Option Jet Needle 13 digits!

- 1st digit is for TAPER angle.
- 2nd digit is for L1.
- LAST digit is for DIAMETER.

Mikuni RS Smoothbore Carburetors

Designed for in-line four cylinder performance motorcycles, the Mikuni RS Series Radial Flat Slide Carburetors offer superior horsepower gains with their maximum flowing smoothbore induction tract and radial flat slide design. An adjustable accelerator pump system helps to provide instant throttle response, particularly in the lower RPM range. The RS Series Carburetors feature a compact design which is 25% lighter than other performance Carburetors and uses readily available Mikuni jets. Available sizes : RS34, RS36, RS38 and RS40mm.

Features of the RS Series Carburetors

- Adjustable Pump Adjust Screws. Sets ON and OFF operation of accelerator pump in relation to throttle slide position.
- Throttle Return Spring. A choice of positioning pegs allow adjustment of spring tension.
- Idle Adjustment Screw. Controls engine idle speed.
- Adjustment Accelerator Pump. Squirts fuel into carburetor venturi when throttle is opened to improve engine response.
- Starter System. Provides fuel enrichment for cold engine starting.
- Adjustable Pump Spray Nozzle. Shoots fuel directly into the intake tract for immediate engine response.

Features of the RS Series Carburetors

- Jet Needle Clip. Easy adjustment feature for quick adjustment.
- Flat Throttle Valve Design. Provides the strongest signal for precise and instantaneous throttle response.
- Float Bowl Vent. Allows atmospheric pressure into float bowl for fuel flow.
- Smooth Throttle Bore/Venturi. Produces the optimum air and fuel mixture flow at all RPM's.
- Genuine Mikuni Jets and Tuning Components. Provides for precise fuel metering.
- Pilot Air Jet. Use in conjunction with the Pilot Fuel Screw for tuning of mixture at idle to 1/4 throttle.

Ordering RS Smoothbore Carburetors

Available in 34, 36, 38 and 40mm bore sizes with different carb spacing for particular bike applications and with different jetting to match engine modifications. Please see application chart listing on next page. **Note:** These are guidelines only. Specifications are subject to change.

RS Series Notes

- Mikuni No. (part number) in application chart above denotes size in millimeters. RS34-D21 = RS34.
- Uses left side throttle linkage.
 - Applications (General) - These are guidelines only. Specifications are subject to change.
 - RS34 and RS36 Carburetors may use Jet Needle #9DZH05.
 - RS38 and RS40 Carburetors may use Jet Needle #9CHY10. Pre Kawasaki KZ1000J models require qt 4 mounting flanges. Order No. 005-866, Qt 4 set.

Mikuni TM Flat Slide Carburetors

Mikuni's original FLAT SLIDE Carburetor. The TM series Carburetors provide significant performance improvements over older round slide Carburetors. Air flows faster and smoother through the TM series venturi due to the flat slide design and the jet blocks which help create smooth bore effect. The high velocity of the air flow means a stronger vacuum at the needle jet providing more precise metering and better throttle response. TM Flat Slide Carburetors are sold pre-jetted, jetting change and throttle valve change. (see listing below)
Please specify when ordering.

Mikuni TM Pro-Series Flat Slide Carburetors

The TM Pro-Series Carburetors feature proven performance gains with a hand machined venturi area. Testing shows Pro-Series carburetor design will out flow many other factory produced Carburetors by a minimum of 10% or more. This venturi design also provides a higher air speed rate at lower RPM's which results in a much stronger, smoother, wider power band. Sold pre-jetted or to customers jetting request. Please specify when ordering.

Early Style TMX

Mikuni TMX Carburetors

The TMX series (early) carburetors feature a flat slide design in a smooth bore venturi to provide improved throttle response and wider powerband. Later series (late) TMX feature a flat/oval type slide. Light weight and compact body. TMX series carburetors are available in 35mm bore size for 125cc race engines and 38mm bore sizes for 250cc race engines.

Sudco Special Jetting for VM Series Round Slide Single Carburetors

Sudco can also “Special Jet” any Mikuni VM series carburetor for your particular application. Below is the information you will need to provide our Carburetor Technician Specialist’s so they can provide you with the correct carburetor and jetting.

1.

Carburetor Size (mm)
2.

Type of Carburetor: Clamp-on, Spigot Mount, Flange Mount, Flat-Slide, etc.
3.

Application: Model, Year and cubic centimeters. (125cc, 250cc, etc.)
4.

Modifications done to engine: Explain in detail, example - big bore kit with cc change, ported cylinder, etc.
5.

Type of use for motorcycle: Street, Drag Racing, Road Race, Motocross, Offroad, Enduro, etc.
6.

Type of Fuel used
7.

Climate conditions: sea level, area of use, high altitude, etc.

Most popular settings are already available. However, if you have modifications done, it is necessary to follow the guidelines to insure receiving the proper jetting at the closest range.

Use the following part numbers when ordering for special jetting or throttle valve change.

VM Series Round Slide Single Carburetors

These are the most popular high performance singles carburetor in the sport of motorcycling. Mikuni’s VM series round slide single Carburetors have proven themselves as the performance standard for use in any single cylinder motorcycle or ATV applications for motocross, enduro and trail riding, to flat track racing and road racing on both 2-stroke and 4-stroke engines.

Performance features for the VM Series Carburetors include a large selection of bore sizes for increased fuel mixture flow to match engine modifications. The VM Series offers a wide range of tuning components to allow precise fuel mixture metering in any application, at any throttle setting, under any riding condition. VM Series Carburetors are sold pre-jetted. (see Standard Jetting Specifications below)
Special Jetting also available, see next page.

Please Note: Changes and jetting modifications are for use only on racing machines or similar off-road vehicles where pollution laws are not in effect. Not legal for vehicles operated on public highways in the State of California or other areas where similar pollution laws may apply.

Quick Reference Chart for Needle Selection (average Performance Chart)

Note: The following listing of needles are simply the average performance of a needle between 1/4 and 3/4 throttle opening. Needles are constructed such that a given point on a needle, (for example, at 3/4 throttle opening), the needle may be found to perform richer at this given point when compared to the same given point on another needle, but according the the average performance chart, the needle should perform leaner.

For example:

Average Performance Chart

At **D-5 (A)**, the taper diameter is **1.915**, at **D-5 (b)**, the taper is **2.040**; the taper diameter at **D-5 (A)** is smaller than **D-5 (B)**. At this given point of throttle opening (**3/4**), needle **#6DH4** will run slightly richer than **#6FJ6**, but the average performance will still be that **#6DH4** will be a leaner needle because it will perform leaner at more given points than a **#6FJ6**. Consequently, if you are concentrating on a specific throttle opening for competition use, be certain to check the taper diameter at that point of throttle opening.

For a more detailed and comprehensive explanation of the various needles as to their taper diameters at given points, see **NEEDLE TAPER DIAMETER DIMENSION CHARTS**.

THE QUICK REFERENCE CHART FOR NEEDLE SELECTION was prepared by measuring the needles as to their diameter at given points. Given points are 10mm apart from each other.

By computing the different measurements and arranging them in order of taper thickness or thinness, three categories for application of needles were determined.

Category I - Competition.
For example, motocross racing and desert racing where mid-range throttle operation is vital.

Category II - Racing.
For example, Road racing, where 3/4 to full throttle operation is vital.

Category III - Overall.
For example, Street riding, where the full range of throttle operation is required.

Two Types of needles

Jet Needles

The Jet Needle controls the fuel mixture in the mid-range (1/4-3/4) throttle position. The taper of the needle determines the amount of fuel. For example, the thinner the diameter of the needle, the more fuel will be drawn. The thicker the diameter of the needle, the less fuel will be drawn.

Two Basic Types of Needle Jets

Needle Jets

The needle jet is the main fuel passage to the main bore (venturi) of the Mikuni carburetor. Depending on the inside diameter of a specific needle jet, this will also effect the function of the needle. Therefore, needle jets and jet needles act together as the main system in controlling the amount and mixture of the fuel which is drawn in mid-range (1/4 - 3/4) throttle operation.

On the following application chart, it is noted that certain needle jets require a specific type of main jet because there are two types of main jets (4/042 Large Hex & N100.604 Large Round) that have different fuel flow rate characteristics. Also, needle jets are available not only in types, but series and sizes. Mikuni series numbers for style of the needle jet. There sizes (inside diameter size) within each series are listed accoring to a letter-number combination. The letter shows the inside diameter size in increments of .050mm.

For example, the difference between P-2 and Q-2 is that the inside diameter of needle jet size Q-2 is .050mm greater than P-2.

The number shows the inside diameter size in increments of .010mm For example, the difference between P-2 and P-4 is that the inside diameter of needle jet size P-4 is .010mm greater than P-2.

Exception: (-5) is measured as an increment increase of .005mm. For example, the difference between P-4 and P-5 is that the inside diameter of needle jet size P-5 is .005mm greater then P-4.

Throttle Valve (Slides)

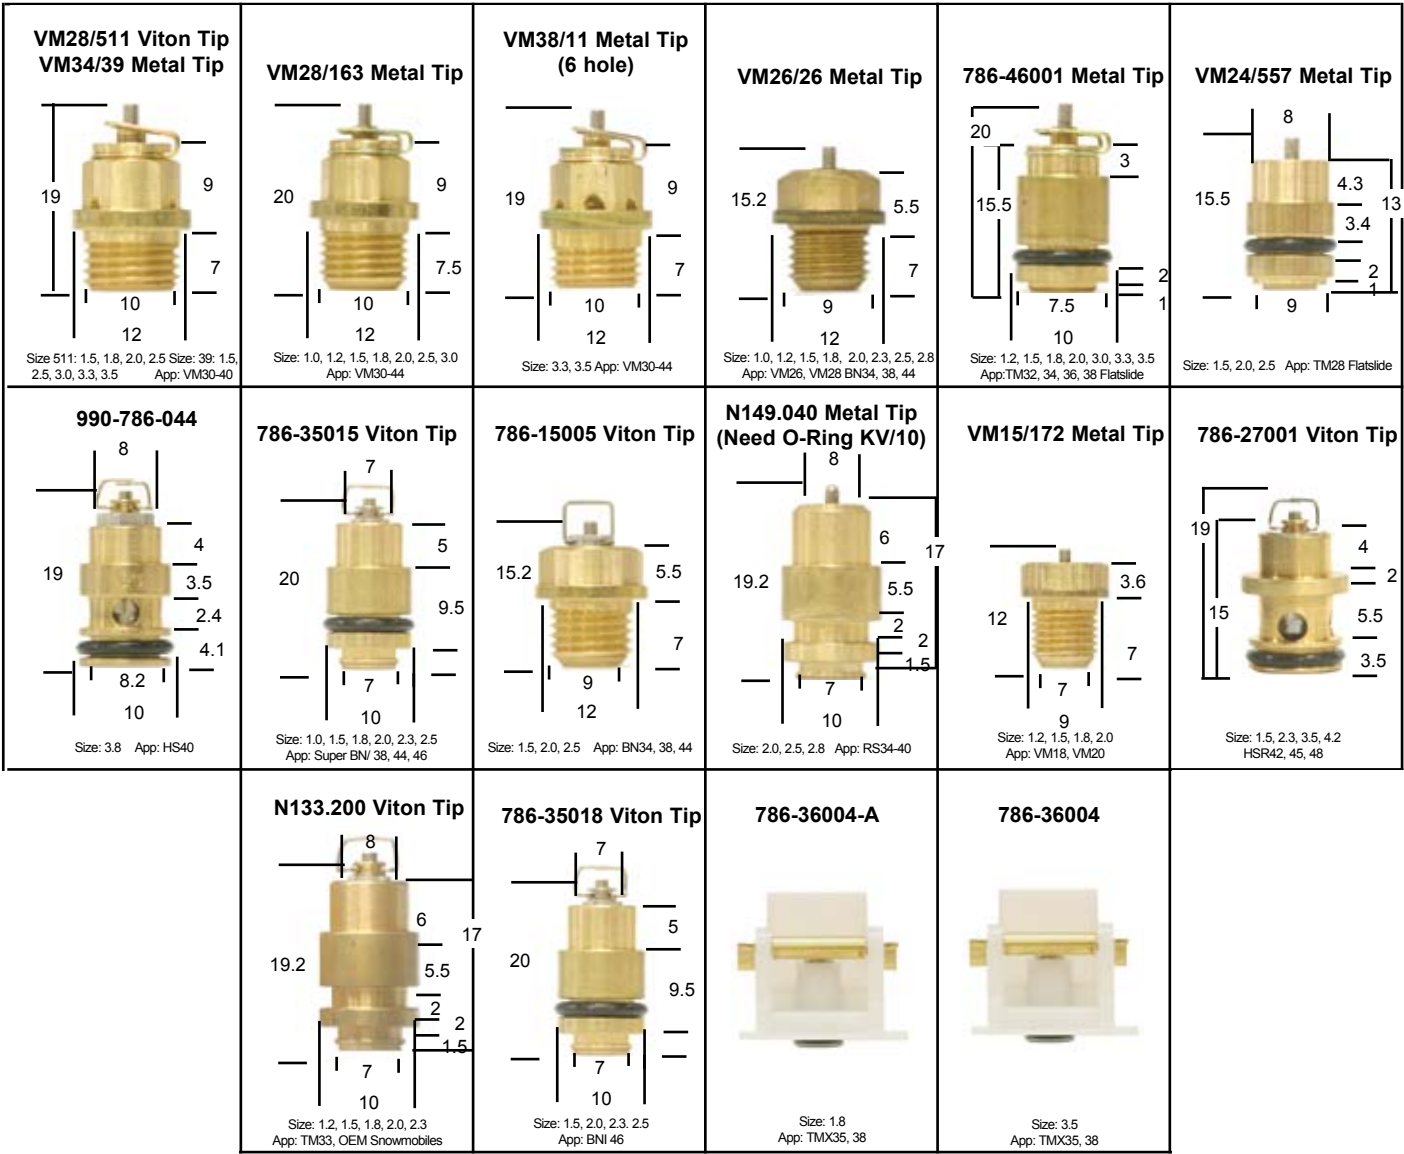

The Throttle Valve (slide) affects the air-fuel mixture ratio between 1/8 and 1/2 throttle, and especially between 1/8 and 1/4 throttle. Throttle Valves come in various sizes called cutaway. The larger the cutaway (size), the leaner the fuel mixture. The smaller the cutaway (size), the richer the mixture. Throttle Valves are sold each.

R&D Racing Power Pump

A whole lot of technology built into such a small part. R&D Racing has designed a "TRUE" bolt-on accelerator pump for the FCR-MX with an adjustable leak jet circuit included. Also included in the design is an anti-cavitation fuel chamber proven to "get the air out" allowing the diaphragm pump to work at full efficiency, producing a far superior throttle response over other designs. Fuel Injection Controller & Air/Fuel Ratio Monitor

Dynatek (F.I.) Fuel Injection Controller

The Dyna Fuel Injection controller is a plug-in module that offers 3 user selectable base fuel curves. Designed to improve engine operation and can be modified to suit a wide variety of modifications. These adjustments are made via 3 potentiometers that adjust the fuel curve in the proper ranges for the application. Fuel mixture can be enriched or leaned as required. The Dyna F.I. Controller use the factory connectors for easy installation and there is no PC required for tuning or adjusting the fuel curves. There are no modifications to the stock ECU and removing the Dyna F.I. Controller returns the vehicle to the factory settings. Available for the following models:

R&D Racing Power Bowl

The Power Bowl from R&D Racing is an innovative fuel supply system float bowl with an anti-cavitation accelerator pump and adjustable leak jet. Designed for the Keihin FCR-MX carburetor, it is bolt-on and requires no modifications. Features include:

- **“ZERO TOLERANCE JET CHAMBER”**
Minimizes existing clearances eliminating the possibility of fuel evacuation from around the main and pilot jet area. (no bog)
 - **“ANTI-CAVATION ACCELERATOR PUMP”**
Designed with two separate fuel ports. Port one is positioned at the highest point in fuel chamber, providing a natural purge, allowing entrapped air to escape through the leak jet orifice. Port two is isolated low in the fuel sump area assuring “Fuel Only” into the venturi.
 - **“EXTERNALLY ADJUSTABLE LEAK JET”**
Quick and easy hand adjustment for fine tuning.
- Available for all 4-stroke MX machines with Keihin FCR-MX carburetor.

K&N ATV Precharger

K&N Precharger is a specially designed filter wrap made to extend the service interval of your K&N Air Filter when used in very dusty conditions. Made from durable polyester material containing uniform micron openings. The Precharger will stop dirt particles as small as .500" diameter, yet only adds a 10% restriction to the airflow of the filter. The Precharger is designed to be run dry and can be cleaned with K&N Filter Cleaner. The Precharger is custom made to fit each application. Elastic openings assure that the Precharger will stay in place. Sold each.

Air Filters & Air Filter Gaskets

PC Racing Pro-Seal™ Air Filter Gasket

PC Racing's Pro-Seal is the answer for a perfect filter to air box seal. Eliminates the use of grease. This neoprene gasket adheres to the rim inside the air box and creates a larger sealing surface. Perfect sealing time after time.

Air Filters & Carburetor Vent System

PC Racing Filterskins™

Filterskins are an extremely thin but durable air filter cover. While allowing maximum airflow, an oiled Filterskin will catch 90% of the dirt that tries to pass through the air filter. Between races or between rides, simply pull off a dirty Filterskin and slide on a clean one. Filterskins are extremely elastic and each size will expand over a wide range of air filters sizes. Sold each.

Pro-Seal™ Airbox Kits for Honda CR/CRF

In addition to filling the gap between the air filter and airbox, this special Pro-Seal™ is cut around and the same height as the nipples inside the airbox. This creates a perfectly flat sealing surface for the air filter. This flat sealing surface eliminates the tendency that the nipples have of pulling the filter away from the cage when the filter is tightened. The Air Boot Gasket is waterproof and has memory, so it will have the same perfect seal if you take your airbox apart again. The Air Boot plate will not flex or distort and in conjunction with the Air Boot Gasket creates a perfect seal for the lifetime of the motorcycle. Sold as kits, includes the following: 1/4" thick neoprene Pro-Seal™ Air Filter Gasket, 1/8" thick 6061 T6 Red Anodized Air Boot Plate, 1/8" thick neoprene Air Boot Gasket and longer Air Boot Screws.

PC Racing Carburetor Vent Systems

PC Racing's carburetor vent system routes the venting hoses from the carburetor upward to a foam filter equipped vent box inside the airbox. This allows fuel to drain free without hesitation and ensures continual airflow into the carburetor. Prevents fuel from vapor-lock in the standard vent hoses. Another function of the vent system is keeping water out of the vent hose in stream crossings and when washing your bike. Vent Systems are available for single and dual carburetors.

Carburetor Vent System: Single Carburetor (Black)
Applications: All single carbureted 2 and 4-stroke ATV's, karts, motorcycles, and snowmobiles with motorcycle style carburetors.
Order No. 945-003

Carburetor Vent System: Dual Carburetor (Blue)
Applications: All dual carbureted 2 and 4-stroke ATV's, karts, motorcycles, and snowmobiles with motorcycle style carburetors. This system works great on Yamaha YFZ350 Banshee.
Order No. 945-010

- Prevents bogging
- Washable filter
- Prevents flooding
- Fits all carburetors
- Velcro-mounted vent box

How to order Vesrah Brakes from Sudco

Brake Pads: All pads have a “610” prefix.

Brake Pad Compounds:

Kevlar/Carbon Pads have a simple 3 digit suffix “610-134”. Sintered Metal Pads have a “JL” after the 3 digit suffix “610-134JL”.

Compound Specification:

Kevlar/Carbon - Since the elimination of asbestos in the Vesrah product line, Kevlar has been the standard brake pad material since 1990. Kevlar/Carbon pads are very temperature stable and have a high coefficient of friction for sure footed braking under all conditions, and are stainless steel rotor safe.

Sintered Metal - The sintered Metal “JL” pads from Vesrah feature the latest generation of high performance friction materials. Sintered metal pads are a mixture of copper, tin, graphite and other materials resulting in a brake pad with very high performance characteristics, especially in wet conditions. Sintered pads are stainless steel rotor compatible.

Brake Shoes: All shoes have a “611” prefix.

Brake Shoe Compounds:

Standard Kevlar / Carbon Shoes have a simple 3 digit suffix “611-150” Grooved shoes have an “NS” after the 3 digit suffix “611-150NS”.

Compound Specifications:

Grooved brake shoes offer more consistent performance in wet conditions and higher friction levels for motocross and offroad racing than with standard shoes.

Factory R&D AV-8B Spring Glide

Factory R&D AV-8B Spring Glide uses a sealed NASA inspired composite bearing technology that improves overall suspension performance. Eliminates spring bind and allows for ease of maintenance and pre-load adjustments. CAD-CAM designed and manufactured from “Aero Space” aluminum. The AV-8B Spring Glide is maintenance free and installs in minutes, just remove the shock and spring and reset sag. Designed for KYB, Showa and WP suspensions. Sold each.

Applications	Color	Order No.
Showa	Red	024-040
Kayaba (KYB)	Blue	024-041
White Power (WP)	Black	024-042

APE Manual Cam Chain Tensioners

A Must for any kind of performance riding. APE manual cam chain tensioners are CNC machined from billet alloy to exact tolerances for perfect fit. Designed to replace the automatic and hydraulic tensioners on high performance engines. The automatic adjusters can back out when the throttle is suddenly closed at high rpm. This allows the cams to go momentarily out of time and can result in bent valves and/or serious engine damage. Hydraulic tensioners have a tendency to put too much tension on the chain guide under high rpm/high oil pressure conditions resulting in premature wear. Both problems can be eliminated with the installation of the APE manual cam chain tensioner. No matter what the engine does, the cam chain tensioner will remain constant. Cam Chain Tensioners are sold each.

APE Kawasaki Cam Chain Idler Adapter

This adapter allows the use of later model GPz 1100 or KZ1000J cylinder head on earlier model KZ900/KZ1000 lower end. It maintains the roller style cam chain. This is the only modification necessary to install the big valve head on early motor. Use with OEM KZ sprockets or high performance aftermarket versions.

Cam Sprockets

APE Adjustable Cam Sprocket Assemblies

For models with Factory Pressed on Sporockets
APE adjustable cam sprocket assemblies allow the cam timing to be adjusted on models with factory pressed on sprockets. The CNC machined APE adapters are pressed on the cams in place of the stock sprocket. Then the slotted sprockets can be adjusted. All assemblies include two adapters, adjustable sprockets, and four bolts.

New! PC Racing Engine Hour Meter

Automatically records and displays your engines accumulated run time, so oil changes, piston, rings, valves, spark plugs, etc. can be serviced at the correct maintenance schedule. The correct schedule saves costly engine damage from service neglect, but Motominder can also save money from servicing too frequently. The smallest engine hour meter available (Approximately 1" x 1.5") it doesnt require additional mounting bracket and can be easily mounted by the peel and stick method to the frame or other convenient area. PC Racing is so confident that moto-minder is the most reliable engine hour meter available that it is backed by a 2-year manufacturer's replacement warranty. Works with all Gas Engines.

Heavy Duty Cylinder Head Nuts

Super heat treated cylinder head nuts are a must for high output engines. Help prevent blown and leaking head gaskets caused by the threads in the soft stock nuts stretching. APE nuts are machined from alloy steel and fully heat treated for maximum strength. Nuts are .150" taller than stock to prevent the nut from bottoming out on the stud when the head has been milled. **Note:** Packed in complete engine sets.

K&N Oil Filters

K&N Oil Filters are TUV production monitored. Synthetic filter media provides outstanding filtration at high-flow rates with less pressure drop and will not break down with today's synthetic oils. 17mm hex nut on spin-on oil filters for easy wrench-off installation with cross drilled safety wire holes. Higher burst point than OEM with heavy-duty, steel outer construction. (spin-on filters) Anti-drain back valve (where applicable) and pre-lubed base gasket ensures a tight steel. Sold each.

FLO® Stainless Steel ‘Drop In’ Oil Filters

This should be the last oil filter you will ever buy! Made from laser cut, medical grade, 304 stainless steel micronic filter cloth, this filter provides 200% more filter area in many cases. Our stainless filter catches items down to 35 microns, which is about 3 times better than most good paper or brass filters. Unlike glued paper filters, the FLO Oil Filter pleat seam is welded and able to withstand up to 600 degrees.

FLO® Stainless Steel Reusable “Spin On” Oil Filters

This should be the last oil filter you will ever buy! Made from laser cut, medical grade, 304 stainless steel micronic filter cloth, this filter provides 200% more filter area in many cases. Our stainless filter catches items down to 35 microns, which is about 3 times better than most good paper or brass filters. Unlike glued paper filters, the FLO Oil Filter pleat seam is welded and able to withstand up to 600 degrees.

- Cleanable and Reusable
- Superior Filtration – 35 microns!
- Proven Aerospace, NASCAR
- Indy and Formula 1 Technology
- High Flow Rate
- Easy Filter Element Inspection
- Unaffected by Water
- Heat or Pressure
- Environmentally Friendly
- Pays for itself

RK X-Ring (XSO) Chain

RK's X-Ring chains feature an X-Ring shaped seal. The X-Ring has two lubrication pools and seal points versus the single seal point/pool design of a regular o-ring chain. X-Ring technology offers less torsional friction, increased high-stress performance, and a 30% longer wear life compared to standard o-ring chains. X-Ring chains offer tremendous value, plus true quality and performance for all but the most demanding high performance applications.

“Works” Triplestar Alloy
Sportbike Sprockets

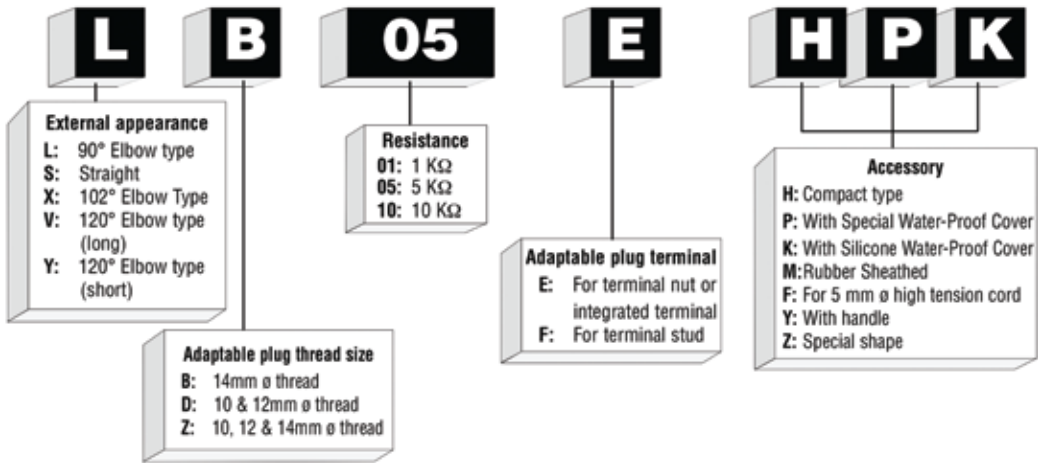

Here's the most cost effective performance and handling improvement modification you can make to your Japanese sportbike. Sunstar Engineering's lightweight 7075-T6 heat treated aircraft grade aluminum Triplestar Sportbike Sprockets save more than 2 pounds of weight over stock steel sprockets to reduce unsprung suspension and reciprocating drive train weight without sacrificing strength. The result is improved handling, quicker acceleration and braking. Combined with a gear ratio change the performance gain can be even more impressive! Each rear sprocket features a computer machined lightening pattern and is completed with an attractive gold anodized finish. Sunstar Triplestar Sportbike Sprockets are used by Team Vance & Hines/Yamaha Superbike and Team

Sunstar OEM Quality Steel
Replacement Sprockets

The same precision quality original equipment sprockets demanded by Japan's leading motorcycle and ATV manufacturers are available as replacement sprockets in America from Sunstar Engineering. Choose from a complete line of rear sprockets featuring Original Equipment designs of heat treated 1045 High Carbon Steel Rear Sprockets for durability, both in stock and a wide range of optional rear ratios for increased performance or economy. For all front sprocket applications there's Sunstar's Chromoly Steel Countershaft Sprockets which are also heat treated for indestructable strength and durability.

NGK Spark Plugs

Utilizing a wide variety of materials, from standard copper-core type to Iridium, NGK is the world's leader in spark plug engineering and technology. NGK Spark Plugs are original equipment on virtually every automotive, ATV, motorcycle, marine, scooter and small engine applications.

Standard & Resistor Spark Plugs

The workhorse, at the heart of smooth-running engines worldwide. Available in standard or resistor.

- OEM quality
- Triple-Gasket Sealing Process
- Consistent Performance
- Plug of choice in millions of Motorcycles, ATV's and Scooters

Nology Pro Fire Compact Ignition Coils

Pro Fire ignition coils utilize advanced technology to supply the energy needed for trouble-free high performance and high rpm operation. They are designed to have the quickest rise time along with substantial energy reserves. Spark voltage is in excess of 45,000 volts over the entire rpm range. Pro Fire coils come in single or dual high tension towers and are available in 0.3 ohm, 0.6 ohm, 1.5 ohm and 3.0 ohm. Coil connectors and boot are included. Sold each. **Note:** To determine which Nology ignition coil to use, measure the primary winding resistance of your stock ignition coil. Round down to the nearest whole ohm.

0.5 ohm and 0.6 ohm primary resistance ignition coils are for C.D.I. type ignitions found on late model ATV, Dual Sport, MX. and Offroad.

Note: Do not use Nology Ignition Coils on point type ignitions or on the following models: Honda VFR, CB, CBX; Kawasaki ZX10, GPZ, KZ1000J, Z1-900; Suzuki GSXR (early oil cooled), GS; Yamaha FJ1100/1200 and VMX12 V-Max.

Nology Hot Wires

Hot Wires are engineered with a unique built-in capacitor that allows energy from the ignition coil to accumulate (stored) untill the voltage can be released as an ultra-short, ultra-hot spark. Combustion is faster and more complete, resulting in increased horsepower and a more complete burn. Hot Wires are compatable with all aftermarket or stock ignition systems. Electronic ignitions are preferred but satisfactory results are achieved with point ignition when the points and condenser are in perfect working order. Each Hot Wire includes a 23" or 30" black silicone Hot Wire with grounding strap, 90 degree or 180 degree (straight) spark plug cap, in-line wire connector and heat shrink tubing. Sold each. **Note:** Requires non-resistor spark plugs. See next page for model specific application kits.

Dyna Mini Series Coils

Advanced magnetic core technology delivers high output in one of the smallest packages available. These coils are designed for use with the Dyna 2000 and 3000 series ignitions, factory installed electronics, or other aftermarket ignitions that employ dwell control.

Dynatek “Dyna” Ignition Wires

Dynatek “Dyna” wires are made from high grade, silicon jacketed, high tension cable. All wires are supplied with spark plug boot and loose coil terminals. Dyna wires are available in solid copper core and graphite suppresor. Use Dyna solid core wires where electrical interference is not an issue. Use Dyna suppresor wires for applications with electronic advance ignitions or other sensitive electronic equip-ment. Both wire types ensure maximum energy transfer. Sold in sets in different colors.

Dyna Ignition Coils

Dyna Ignition coils are high tech, top quality coils designed for maximum performance. They produce spark voltages in excess of 30,000 volts and spark energies second to none. Dyna coils are available in a wide variety of resistances and output configurations to allow easy replacement of stock coils. Dyna coils work with factory electronic ignitions, points and aftermarket ignitions. Before selecting a coil, check the coil primary resistance requirements as specified by themanufacturer of the ignition being used. All Dyna coils are sold in pairs unless otherwise noted.

Dyna 3000 Digital Performance Ignition Module for Cruisers

The Dyna 3000 combines state of the art microprocessor technology. Direct mounting on factory locations so you can maximize engine performance by setting ignition timing to fit your specifications.

- Features include:
- 10 advance curves for Honda, 8 Advance Curves for Kaw/Suz/Yam
 - 9 Selectable Rev Limits for Honda (increased rev limits over stock)
 - 8 Selectable Rev Limits for Kaw/Suz/Yam (increased rev limits over stock)
 - STATUS LED:
 - A) Indicates power-up, (all models listed)
 - B) Indicates pick-ups (all models listed)
 - C) Indicates TPS (throttle position sensor) operation (applicable models only)
 - D) Indicates MAP sensor operation (applicable models only)
 - E) Retard Function (applicable models only)
 - Easier Starting
 - Plug and ride, 5 minute installation (on most models)
 - Uses all Factory Sensors
 - Mounts Directly to Factory Location
 - Use OEM Ignition Coils or Dyna Ignition Coils
 - Reverse Battery Protection
- Available for the following models:

Boyer Bransden Electronic Ignition

Boyer Bransden ignitions are fully electronic “breakerless” kits and are compatible with positive or negative ground systems. Boyer ignitions are capable of reliable operation up to 10,000 RPM on most 4-stroke applications. “Reliable As Rock” reputation and virtually maintenance free when installed on a fully functional charging system. Available for the following applications:

Dyna 2000 Digital Performance Ignition for Sportbikes

The Dyna 2000 Digital Performance Ignition represents a break through in motorcycle ignition flexibility. The Dyna 2000 system consists of a state-of-the art microprocessor controlled ignition module along with an adjustable Dyna dual sensor crank trigger. For the first time you can actually set the ignition timing to what you want to maximize engine performance. A number of different advance modes and a broad range rev limiter let you tailor the ignition to your needs. **Note:** Sudco part numbers with an asterisk* come with compatible Dyna Ignition coils.

Dyna Voltage Monitor

The Dyna Voltage Monitor is a necessity for any battery ignition vehicle which does not have a charging system. "Total Loss" ignition systems are typical of racing bikes and race cars that depend on the battery voltage only for proper operation. The Voltage Monitor will give a clear indication of battery condition with a quick glance at the three LED indicators. Sold each.

Before

After

We cut this gas tank in half and treated half of it with Rustol

Rustol

Rustol gives excellent results with little or no work required. It is safe and non-corrosive to all metals, rubber coatings and paint. While destroying existing rust, it forms a protective bond that prevents new rust from forming later. Rustol is odorless unlike conventional rust removers, and is shipped in a concentrated form. Believe it or not, the same batch of Rustol can be used many times. Note: Rustol should be diluted according to instructions before use.

Z1-900 One Piece Head Gasket

Replacement head gasket for 1973 Kawasaki Z1-900.
Sold each. **Made in Japan.**

Order No. **609-880**

Heavy Duty Cylinder Head Studs

Heavy duty cylinder studs are necessary to prevent head gasket leakage in high compression and turbocharged engines. Stock studs are made from poor material that will stretch and allow gasket leakage. APE studs are made from heat treated chrome moly and have rolled threads for maximum strength. Sold in sets.

Cam Chain Tensioners

APE Manual Cam Chain Tensioners for Vintage Applications

A Must for any kind of performance riding. APE manual cam chain tensioners are CNC machined from billet alloy to exact tolerances for perfect fit. Designed to replace the automatic and hydraulic tensioners on high performance engines. The automatic adjusters can back out when the throttle is suddenly closed at high rpm. This allows the cams to go momentarily out of time and can result in bent valves and/or serious engine damage. Hydraulic tensioners have a tendency to put too much tension on the chain guide under high rpm/high oil pressure conditions resulting in premature wear. Both problems can be eliminated with the installation of the APE manual cam chain tensioner. No matter what the engine does, the cam chain tensioner will remain constant. Cam Chain Tensioners are sold each.

APE Kawasaki Cam Chain Idler Adapter

This adapter allows the use of later model GPz 1100 or KZ1000J cylinder head on earlier model KZ900/KZ1000 lower end. It maintains the roller style cam chain. This is the only modification necessary to install the big valve head on early motor. Use with OEM KZ sprockets or high performance aftermarket versions.

APE Adjustable Cam Sprocket Assemblies

For models with Factory OEM Bolt on Sprockets

APE manufactures the original “billet” adjustable cam sprockets. APE sprockets are necessary for precise cam timing to achieve maximum performance. APE sprockets are fully machined on the latest state of the art computerized equipment to precision tolerances and fully heat treated for extra long wear life. Its cam sprockets are used by most leading racers who demand top performance along with the safety of not chancing their expensive racing heads to reworked stock sprockets.

Electronic Ignition

Dyna 2000 Digital Performance

The Dyna 2000 Digital Performance Ignition represents a break through in motorcycle ignition flexibility. The Dyna 2000 system consists of a state-of-the art microprocessor controled ignition module along with an adjustable Dyna dual sensor crank trigger. For the first time you can actually set the ignition timing to what you want to maximize engine performance. A number of different advance modes and a broad range rev limiter let you tailor the ignition to your needs. **Note:** Sudco part numbers with an asterisk* come with compatable Dyna Ignition coils.

New PC Racing Engine Hour Meter

Automatically records and displays your engines accumulated run time, so oil changes, piston, rings, valves, spark plugs, etc. can be serviced at the correct maintenance schedule. The correct schedule saves costly engine damage from service neglect, but Motominder can also save money from servicing too frequently. The smallest engine hour meter available (Approximately 1" x 1.5") it doesn't require additional mounting bracket and can be easily mounted by the peel and stick method to the frame or other convenient area. PC Racing is so confident that motominder is the most reliable engine hour meter available that it is backed by a 2-year manufacturer's replacement warranty. Works with all Gas Engines.
